DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species:

- a. Species I, Figs. 1-11.
- b. Species II, Fig 12-16.
- c. Species III, Figs. 17-18.
- d. Species IV, Figs. 19-20.
- e. Species V, Figs. 21-24.
- f. Species VI, Figs. 25-27.
- g. Species VII, Fig. 28.

2. The species are independent or distinct because they contain different circuitry which means that there is different operation and driving of these circuits. When comparing Species I and Species II the "Deactivation Detect Circuits" are placed close to the gate line drive circuits. When comparing Species I and III, a signal transmitted from level shifter 41 to a corresponding gate line GL is used in place of output signals of AND gates 40a and 40b. When comparing Species I and Species IV, fig. 19 uses a DA conversion circuit compared to Data line drive circuit of fig. 3. In regards to Species IV and V, Species V has an input signal that has a doubled cycle of the driving cycle of the gate lines. In regards to Species VI, Species VI includes a dummy circuit connected through the Deactivation Detect Circuit. Finally, Species VII includes an electro-luminescence element

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
